

Montassar Hizem

Full Stack Engineer

Highly competent, hardworking and detail-oriented with the capacity to go beyond what is expected to achieve higher career goals. Looking for a new opportunity as a Full Stack Engineer.

Education

09/2019 - 12/2022

Private Higher School of Engineering and Technology ESPRIT

- Computer Science Engineering specialized in web development

09/2017 - 06/2018

SESAME University

- Integrated Preparatory Cycle

Work Experience

04/2023 - Present

Full Stack Engineer - Amineware

- Developed a web application for managing delivery agents, their schedules, and payroll using **Angular**, **Bootstrap**, **Nestjs**, and **MongoDB**. I was responsible for the development and implementation of various modules, including:
 - Scheduling, which allows for employees schedule management. And Payroll, which automates employees compensation.
- Developed the backend of a mobile application using **Nestjs**. I was responsible for the development of various modules, including:
 - Scheduling, enabling employees to manage their schedules from the mobile application. And Tips and refunds, which allows for the review of tips and reimbursements.
- Utilized various **AWS** services, such as **AWS CodeCommit** for source control, **AWS S3**, and **AWS SQS**, as well as **Docker** for project containerization.
- As a **Scrum Master**, I facilitated sprint planning, retrospectives, and team communication.

09/2022 - 04/2023

Freelance Full Stack Developer - Octoplus

- Built a web application for butterfly.ai that helps BtoC companies to set up data-driven customer-centric strategies using **Vue.js 3**, **TypeScript**, **Tailwind CSS**, **Nestjs**, **Prisma**, **PostgreSQL**. I was responsible for developing and implementing various features, including:
 - Segmentation, enabling users to categorize and analyze various targets such as products and customers. And Sales and Customer analytics to enhance understanding of revenue and customer behavior.
- Implemented **Clean Architecture** and **DDD** principles, and **TDD** approach using **Jest**. And used Devops tools like **Docker** and **Gitlab-CI**.

02/2022 - 08/2022

Full Stack Developer Intern - Octoplus

- Built an open source projects management web application using **Vue.js 3**, **TypeScript**, **Tailwind CSS**, **Nestjs**, **Prisma**, **PostgreSQL**.
- Built a Google Chrome Extension, a task clipper that helps our web application users to capture their actions from any web page as tasks and add them to their boards, using **HTML5/CSS3**, **JavaScript**, **Ajax**, **JQuery**.
- Built a slack application that helps our web application users to manage their boards and tasks via Slack, using **TypeScript**, **NodeJs**, **Express.js**.
- Implemented **Clean Architecture** and **DDD** principles, and **TDD** approach using **Jest**.

06/2021 - 08/2021

MEAN Stack Developer Intern - CIMF

- Built a leave management web application for the administration and the employees using the **MEAN Stack** architecture : **MongoDB**, **Express.js**, **Angular** and **NodeJs**.

07/2019 - 08/2019

Web Developer Intern - Sagemcom Tunisia

- Built a technical interventions requests management web application using **HTML5/CSS3**, **JavaScript**, **Ajax**, **JQuery**, **PHP** and **MySQL**.
